# SPA2 FIBER FILM

The SPA2 range of laser coders is the next generation of Macsa's successful SPA, Smart Packaging Application, laser platform. The SPA2 range adds more power options including pulsed CO2 lasers.

# SPA2 F FILM

### RELIABLE FAST SMART

SPA2 Fiber Film lasers are widely used in packaged goods applications including trays, pouches and wraps. They are typically used to code printed films where it is important not to perforate the packaging.

- 10.1-inch touch screen controller with context sensitive HELP and on-line instruction videos.
- DUO dual processor technology enables high-speed and high-quality printing with variable data.
- Protection enclosures are available for dusty (IP54) and washdown (IP65) environments.

# SPA2 ICON : SPA2

# The most complete range of CO2, Fiber and DPSS lasers on the market

## ADAPTABILITY

Wide range of essential and extra accessories to optimise the laser's performance.

### Videos and support material to facilitate its installation and integration.

SIMPLICITY

# SOFTWARE AND SERVICES

## MONITORING AND PREDICTIVE MAINTENANCE

From any place and at any time, data is provided in real time to increase productivity, improve e ciency and reduce downtime. It allows monitoring of the status of the equipment from any remote device which can allow the reception of alerts. IntegraNET allows our service engineers to receive Diagnostics in real time to detect problems before they occur and prevent expensive downtimes.

# Why Macsa id?

Macsa id is one of the 4 leading companies in the world in coding and marking lasers. It offers the widest range of lasers to code and mark both in the productive sectors (food, beverages, pharmaceutical, healthcare, cosmetics ...) as well as in the industrial ones (industry, automotive, aeronautics, defense, construction materials ...).

Macsa id is recognized as a world leader in technological innovation in lasers for marking and coding. The company invests more than 10% of its turnover in R&D every year.

Macsa id in more than 80 countries

- MACSA Headquaters
- MACSA Branch Offices
- MACSA Distributors
- MACSA JV

SE Standard Environment IP31 F-20 FILM / F-50 FILM / F-100 FILM

WD Washdown IP55 / IP65 F-20 FILM / F-50 FILM / F-100 FILM

Fiber Film From 20W to 100W DPSS

From 6 to 20W (also Green & UV available)

# RELIABILITY

Production environments can test the reliability of laser systems. SPA2 lasers are designed to operate reliably in dusty or damp environments even when subject to extreme temperatures.

**RAF**<sup>\*</sup> Reverse Air Flow

# CONNECTIVITY

The lasers include the TCP/IP protocol in order to have complete control of the system from most standard communications. The new SPA2 platform includes the integration of the most widely used industrial communication protocols such as Profinet and OPC-UA. These are both available in all models upon request.

Maintaining Service

Equipment performance

# REMOTE ASSISTENCE

IntegraNET allows field technicians and Macsa id engineers to interconnect and exchange information through video calls

# INCREASED EFFICIENCY

The collected data is integrated with the different software of Macsa id modules for production management, traceability and effciency of the production lines.

### NO CONSUMABLES A clean technology that does not produce waste.

ENVIRONMENT FRIENDLY No harmful emissions are generated, thus benefitting the work environment and the planet.

CLEAN For a cleaner and healthier workspace.

ENERGY EFFICIENT Maximum quality and coding speed with just the right amount of energy.
